SHREYA AMBASTHA

9065715715 | ambasthashreya.08@gmail.com | linkedin | github

SUMMARY

Results-driven Computer Science student with a strong foundation in Java, Object-Oriented Programming (OOP), and Data Structures & Algorithms. Experienced in building RESTful APIs and backend services with Spring Boot and Node.js/Express, integrating SQL and NoSQL databases, and writing clean, maintainable, well-tested code. Comfortable debugging and optimizing application performance, working with Git version control, and collaborating in team environments. Strong analytical and problem-solving skills with clear communication, seeking a Backend Development Internship to contribute to production-ready, cloud-native systems.

EDUCATION

Presidency University Bengaluru, India Jul 2023 – Jul 2027

B.Tech in Computer Science & Engineering (Big Data) 8.66 cgpa

EXPERIENCE

Technical Intern – Web Development Jun 16, 2025 – Jul 16, 2025

Drobozone Innovative Centre Pvt. Ltd.

- Completed a one-month internship contributing to web development tasks, technical operations, and process improvements as part of a technical team.
- Gained hands-on exposure to real-world development workflows, applying **debugging**, collaboration, and problem-solving skills on live tasks.

TECHNICAL PROJECTS

Task Management Web Application *React · Node.js · Express.js · MongoDB · JWT · REST APIs · Tailwind CSS*

- Developed a full-stack SPA with a React frontend and Express/Node.js **REST API** backend following **Object-Oriented**, MVC architecture for maintainability and scalability.
- Designed and built **RESTful APIs** for task creation, retrieval, status updates, and deletion, applying clean, **maintainable** coding practices and consistent API design conventions.
- Implemented secure JWT-based authentication and authorization, and integrated **MongoDB database** models with schemas designed for efficient queries and data integrity.
- **Debugged** and **optimized** API **performance** and data synchronization via Axios integration with **third-party** services; used **Git** for **version control** in preparation for team-based **code review** workflows.

Big Data Analytics Platform *Python · Apache Spark · Hadoop HDFS · Kafka · Hive · SQL · Matplotlib · Docker*

- Built an end-to-end Big Data analytics platform integrating Apache Spark, Had**oop** HDFS, and Hive for distributed data processing, **database** storage, and **SQL**-based analytics.
- Developed, **debugged**, and **optimized** Spark ETL pipelines for scalable batch processing, and integrated Apache Kafka for real-time streaming using a producer-consumer, **microservices**-style architecture.
- Designed Hive tables and analytical **SQL** queries, **troubleshoot**ing **performance** bottlenecks, and used Docker for consistent, **cloud-native** deployment; created Matplotlib dashboards to visualize regional sales trends.

AI-Powered Resume ATS Analyzer *Python · Streamlit · Pandas · Scikit-learn · PyPDF2 · NLP*

- Developed an AI-powered Resume ATS Analyzer leveraging NLP and Machine Learning to automate resume screening, using PyPDF2 for PDF parsing and structured data extraction.
- Engineered a keyword matching and semantic analysis engine with Scikit-learn and Pandas, applying **object-oriented** design and **algorithmic** problem-solving, and built an interactive Streamlit application for real-time analysis.

CERTIFICATIONS & ACHIEVEMENTS

- Software Engineering Job Simulation (JPMorgan Chase & Co. – Forage), Jan 17, 2026 — **Debugging**, system design, and data visualisation.
- Advanced Software Engineering Job Simulation (Walmart Global Tech – Forage), Jun 23, 2025 — Data structures, software architecture, and **database** design.
- **Java**Script (Intermediate) Certification (HackerRank) — Validated JS fundamentals, problem-solving, and **algorithmic** coding skills.
- AI Skills Passport Certification (EY & Microsoft) — Core AI concepts, ethics, and employability skills for AI-driven environments.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, HTML/CSS

Backend & Frameworks: Spring Boot, REST APIs, Node.js, Express.js

Databases: MySQL, MongoDB

Tools & Practices: Git, GitHub, Version Control, Docker, Code Reviews, Debugging & Performance Optimization

Big Data: Apache Spark, Hadoop, Apache Kafka, Hive

Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms, Microservices, Cloud-Native Deployment, Analytical & Problem-Solving, Team Collaboration
